

NUNO ARRANJA

Software Developer |
Computer Science
Student

PERSONAL BACKGROUND

I'm a 27 years old tech enthusiast. I started my academic journey in Automation, Control, and Instrumentation Engineering but my passion for programming eventually played a significant role in my switch to Computer Science Engineering. Since then, I have had the opportunity to apply programming knowledge through my experiences as an SAP ABAP consultant. I am a natural curious person, which allows me to quickly develop knowledge. I have been involved in various areas, both professionally and through internships, which has allowed me to gain a wealth of experience and knowledge.
